

## WHY PROPER SPEAKER STANDS ARE IMPORTANT

Music has existed since the dawn of time, but people have only been listening to music on machines since Edison invented the gramophone. Generations of music listeners have sought methods to improve the quality of sound ever since.

PLATEAU Corporation has contributed to this search for excellent sound quality with our unique and inventive line of speaker stands.

### IF YOU COULD SEE SOUND...

you would see sound waves coming from your speakers, bouncing and colliding with the walls, floor, ceiling, plus every object in the room. Each collision disrupts the natural flow and distorts the quality of the musical message.

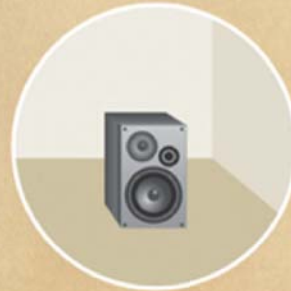

## IF YOU COULD SEE SOUND

Speakers placed on the floor and stuck in a corner produce an uncomfortable overpowering bass and depressed mids and highs.

Speakers placed against a wall and put on the floor exaggerate the bass and muffle mid and high range sounds.

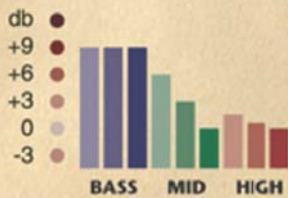

Speakers moved away from the wall but still on the floor produce an unnatural bass and uneven mid and high range of sound.

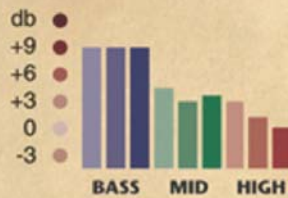

Speakers allowed to rest in a free air environment raised from the floor and away from the wall produce an even and smooth bass and a superb sound quality.

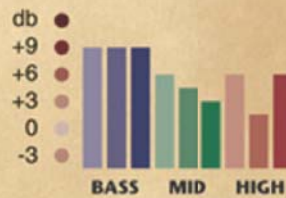

### FREQUENCY RESPONSE

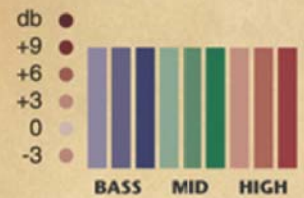

2/10

4/10

7/10

10/10

Undoubtedly the best sound quality!

### PERFORMANCE RATING

## IF YOU COULD SEE SOUND

PLATEAU Corporation has combined years of technological experience and sound system engineering to produce speaker stands that are designed to provide the perfect listening experience. Our speaker stands are deliberately constructed to raise speakers off the floor and position them away from walls that distort and disrupt natural sound quality.

**Finally**, a speaker stand has been invented to enable every music listener to hear music the way it was intended: **uninterrupted, beautiful and clear.**

The final placement of your speakers will be up to you and your ears. With our free air design, quality craftsmanship and premium materials, you know we will always be solidly in your corner.
